### **Device & access information**

**DEVICE SELECTION:** If you are using a desktop PC, your computer must have a speaker and a microphone (like what you would need to use Skype on your computer).

If you are using a Mac computer, smart phone, or a smart device you can use the earbuds or headset that you would use to make a phone or video chat conversation.

A webcam is nice but not essential, if you have a webcam then we will be able to see one another.
